

STOP!

You MUST verify that
your terminal has been programmed
with the correct account number in order
to receive your funds for check transactions.

Complete the following procedure after the terminal has been programmed with the Check Processing service:

1. Press the **Menu/ESC** key on the terminal.
2. Press the **4** key.
3. Press the **3** key. A long report will print.
4. Fax this report with your BUSINESS NAME to 855-676-2825

This procedure ensures that your Check Processing service has been correctly installed on your terminal.

Failure to complete this verification will prevent your business from receiving funds from processed checks.
