

Connect direct Integration solutions

Empower your payment gateway or virtual terminal to support all programs.

Increase merchant retention by making your virtual terminal a one-stop payment gateway! You have two options: integration or plug-in.

Integration

- Code your existing gateway or virtual terminal to connect to our web services API.
- Merchant inputs transactions from your payment gateway screen.

Plug-in

- Embed a link into your existing interface and merchants will be automatically logged into the check and gift card processor's Virtual Terminal.
- Simple web service call for giving merchants access to the check and gift card processor's Virtual Terminal within your own.
- Minimal database modification: Need only to store check and gift card processor's merchant user name and password.
- Minimal coding work required.
- Generic appearance to blend with existing gateway.
- No coding required for readers or imagers. Merchants have access to a wide variety of supported devices.

Features

Connect direct supports all electronic check processing and gift and loyalty programs: Check 21, electronic check conversion and guarantee, ACH Debit, Checks-By-Phone and Gift Card and Loyalty Program.

Web based reporting features full transaction tracking, reconcile billing, view statements, transaction history, fast access to batch detail and much more. Available from within your existing gateway or virtual terminal.

Set-up procedure

1. Complete the developer inquiry form online at:
www.globalelcom.com/developer-inquiry.aspx
2. Receive spec packet
3. Testing and certification dates assigned
4. Complete certification testing in order to go live
