You will need to link your mIDeal to the proper driver if:

1) If you receive the dialog shown below when you first connect the mIDeal to your PC using a USB connection

Driver Software Installation	
Device driver software	was not successfully installed
miDeal	XNo driver found
You can change your setting t Change setting	to automatically search Windows Update for drivers
What can I do if my device did	I not install properly?
	Close

2) Even if you do not receive the dialog above, if your mIDeal is not responding check device manager, as shown below, to see if it is necessary to link your mIDeal to the proper driver.

Download mIDEal Inf Files

Login as user: Password: Downloads@PaniniNA.Com P@ssw0rd

2. From the Panini Support Downloads folder, download and extract the file **mIDeal Inf Files.Zip** to your desktop. The password for the .zip file is *unified.33*

Right-Click of the *mIDeal* entry in the device manager list, then click on *Update Driver Software*.

•	Search automatically for updated driver software Windows will search your computer and the Internet for the latest driver software for your device, unless you've disabled this feature in your device installation
	settings.
*	Locate and install driver software manually.

When this dialog is shown, click on Browser my computer for driver software

Navigate to the folder you extracted to your desktop and Click OK

Windows will install the mIDeal driver.

Update Driver Software - mi:Deal USB Ethernet/RNDIS	Real Property lies					
Windows has successfully updated your driver software						
Windows has finished installing the driver software for this device:						
mi:Deal USB Ethernet/RNDIS						
		Close				

When this Window is displayed, the installation is complete and the mIDeal should be working.

The mIDeal should now be seen in device manager as shown above.
