

Optimum M4200 Family

Security Access Module (SAM) Card Installation

Remove any packaging from your SAM plug-in.

Turn the terminal over. Remove the SAM cover located beneath the smart card reader opening (as shown) to reveal three SAM slots.

With your fingers, insert the SAM plug-in (gold side up) into an available slot (as shown). Push the SAM plug-in until firmly seated.
Note: Embossed diagrams on each SAM slot provides additional assistance for proper installation.

Re-install the SAM cover. The terminal can now run the unique application that requires the SAM plug-in.
