Introducing Hypercom's new Optimum T4200 family:

Everything **You** Asked For and More.

Starting right now, there's a whole new line of high-performance countertop POS devices. The Optimum® T4200 family from Hypercom is the next generation of sleek, powerful, adaptable payment terminals. Choose from three communication technologies: high-speed dial-up, power-packed and secure Ethernet IP with dial back-up, or portable GSM/GPRS wireless with dial back-up — all using one tool kit and user interface for ease of support and migration.

Now you can simplify support, move transactions faster and more securely than ever, and satisfy the needs of customers across the board. All from Hypercom, the first name in Trusted Transactions.

 **Optimum T₄₂₁₀**

Faster Downloads

Take advantage of unmatched application download speeds and faster transactions because every T4200 family model comes with an integrated V.34 modem. At 33.6 Kbps, it's blazing fast, faster than competitive devices. The T4220 IP model is simply the fastest IP model on the market supporting full downloads in under two minutes.

 **Optimum T₄₂₂₀**

Merchant Retention

The HyperSafe 32 architecture guards your investment against unauthorized loading of applications. Keep hackers and rival competition away using this simple to install system to fully protect the point of service. Designed in conjunction with RSA, the security experts!

 **Optimum T₄₂₃₀**

Need More Memory? Not Anymore.

With huge, 24MB memory, all the value-added applications you need will fit in the T4200 family of devices. More memory than the competition means room for growth—to more demanding software, more complex applications. Want multi-app in every model? The T4200 family allows unlimited multi-application in every model.
